Fitting Instructions – UB31534/5/6/7 Door Seals

Part Numbers: UB31534-X, UB31535-X, UB31536-X, UB31537-X

The door seals you have been supplied are approximately 5% smaller than the door aperture. This is intentional to enable the seal to be stretched slightly on fitting. Stretching applies a small amount of tension to the "bulb" of the seal, which improves the efficacy of the seal. To fit, start at the mitred corner and work around the door, working the length of the seal until the two ends meet at the bottom.
